Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 42-58 are rejected under 35 U.S.C. 102(e) as being anticipated by Numao (U.S. patent no. 5,103,328).

As per claims 43-45,52 Numao shows movement degree detection circuit for normal and fast movement state (in col.4 lines 65-67 to col.5 lines 1-35).

As per claim 46,53-55 Numao shows current of the backlight increased when the lighting time period becomes shorter (in col.3 lines 1-10).

As per claims 47-50,56-58 Numao shows backlight unit includes a lamp and current of the lamp is increased when the lighting time period becomes shorter and time
